PROJECT GUIDE:

DR. HET TRIVEDI

DR. BADAL KOTHARI

INTRODUCTION

- The Hostel Management System is a software application that helps in managing hostel activities in an easy and efficient way.
It is used to maintain student details, room allocation, fee records, select mess, view notice and complaints in digital form.
- This system reduces paperwork and saves time by automating daily hostel operations. It also helps hostel administrators to manage data accurately and students can easily submit complaints and feedback.
- The Hostel Management System Helps Manage hostel Activities Digitally.
- Overall, the Hostel Management System makes hostel management more organized, fast, and reliable.

EXISTING SYSTEM

- The system is mostly paper based.
- Student must visit the office for every request.
- Searching Old records takes more time.
- In paper base records lost easily.
- Complaints are handled late.

NEED FOR NEW SYSTEM

- To reduce manual paperwork.
- To store data securely in digital form.
- To save time & efforts.
- Very fast management for room allocation, fees, complaints & refund handling.
- Digitalization of Mess for online ordering, billings, & feedback to run it efficiently.

TECHNOLOGIES USED

- Front-end : HTML, CSS
- Back-end : .NET , C#
- Database : MySQL
- OS : Window I I

MODULES

- Admin
- Student
- Warden

MODULES

Admin

- Manage Student
- Manage Profile
- Manage Mess
- Manage Room
- Manage Fees
- Manage Refund
- Manage Rules & Regulations

MODULES

Student

- Student Registration
- Student Profile
- Select Mess
- Select Room
- Leave Request
- Pay Fees
- Generate Complaint
- View Notice

MODULES

Warden

- Manage Complaint
- Generate Fees
- Leave Approval
- Notice

[0 Level (Context)]

[1st Level DFD For Admin]

[1st Level DFD For Student]

[1st Level DFD for Warden]

❖ DATA DICTIONARY

Table Name : Admin_Master

Description : It will store the data of Admin

Primary Key : Admin_id

Sr no.	Field Name	Data Type	Size	Constraints	Description	Example
1	Admin_id	Int	-	Primary Key	Admin unique ID	101
2	Name	Char	50	Not null	Admin name	admin
3	Password	Varchar	20	Not Null	Encrypted Password	****
4	Email	Varchar	50	Not Null	Admin Email	admin@123*

Table Name : Student_Master

Description : It will store the data of Student

Primary Key : Stud_id

<u>Sr no.</u>	<u>Field Name</u>	<u>Data Type</u>	<u>Size</u>	<u>Constraints</u>	<u>Description</u>	<u>Example</u>
1	Stud_id	Int	-	Primary Key	Unique student ID	201
2	Name	Char	50	Not null	Student name	Student
3	Phone_no	Int	13	Not Null	Student phone number	+919876543210
4	Password	Varchar	20	Not Null	Encrypted Password	****
5	Gender	Char	10	Not Null	Gender of Student	Male or Female
6	Email_id	Varchar	50	Not null	Student email ID	student@gmail.com
7	Room_id	Int	-	Not Null, Foreign Key	Room where student is staying	401

Table Name : Warden_Master

Description : It will store the data of warden

Primary Key : Warden_id

<u>Sr no.</u>	<u>Field Name</u>	<u>Data Type</u>	<u>Size</u>	<u>Constraints</u>	<u>Description</u>	<u>Example</u>
1	Warden_id	Int	-	Primary Key	Warden unique id	201
2	Name	Char	50	Not null	Warden name	warden
3	Phone_no	Int	13	Not null	Warden phone number	+919012345678
4	Password	Varchar	20	Not Null	Encrypted Password	****
5	Email	Varchar	50	Not null	Warden email	warden@123

Table Name : Room_Master
Description : It will store the data of room
Primary Key : Room_id

<u>Sr no.</u>	<u>Field Name</u>	<u>Data Type</u>	<u>Size</u>	<u>Constraints</u>	<u>Description</u>	<u>Example</u>
1	Room_id	Int	-	Primary Key	Unique room id	201
2	Room_No	Int	-	Unique	Room Number	401
3	Floor_No	Int	-	Not Null	Floor Number	2
4	Room_type	Char	20	Not null	Type of room	Single-AC or Triple-Non AC
5	Room_Status	Char	20	Not Null	Room status if available or not	Occupied
6	Rent	Int	-	Not Null	Rent amount per month	15000
7	Date	Date	-	-	Room allotment date if occupied	12-01-2026

Table Name : Mess_Master

Description : It will store the data of Mess

Primary Key : Mess_id

<u>Sr no.</u>	<u>Field Name</u>	<u>Data Type</u>	<u>Size</u>	<u>Constraints</u>	<u>Description</u>	<u>Example</u>
1	Mess_id	Int	-	Primary Key	Id of mess order	101
2	Food_Item	Varchar	100	Not Null	Details of mess services and food offered	Paneer 65 or Gujarati Thali
3	Price	Int	-	Not Null	Mess item charge	250
4	Stud_id	Int	-	Not Null, Foreign Key	Student Id	201
5	Fees_id	Int	-	Not Null, Foreign Key	Payment Id	301
6	Food Quality	Int	-	Not Null	Ratings out of 5	4

Table Name : Fees_Master

Description : It will store the data of Fees

Primary Key : Fees_id

<u>Sr no.</u>	<u>Field Name</u>	<u>Data Type</u>	<u>Size</u>	<u>Constraints</u>	<u>Description</u>	<u>Example</u>
1	Fees_id	Int	-	Primary Key	Fees record ID	501
2	Stud_id	Int	-	Not Null, Foreign Key	Id of student paying	301
3	amount	Int	-	Not null	Fees amount	12000
4	Status	Char	20	Not null	Payment Status	Successful/Failed
5	Date	Date	-	Not Null	Payment date	04-01-2026

Table Name : Refund_Master

Description : It will store the data of Refund

Primary Key : Refund_id

<u>Sr no.</u>	<u>Field Name</u>	<u>Data Type</u>	<u>Size</u>	<u>Constraints</u>	<u>Description</u>	<u>Example</u>
1	Refund_id	Int	-	Primary Key	Refund Id	301
2	Fees_id	Int	-	Not Null, Foreign Key	Id of fees payment to be refunded	101
3	Stud_id	Int	-	Not Null, Foreign Key	Student Id	201
4	Refund_amount	Int	-	Not Null	Refund amount	2500
5	Status	Char	20	Not Null	Refund status	Approved

Table Name : Rules_Master

Description : It will store the data of Hostel rules

Primary Key : Rule_id

<u>Sr no.</u>	<u>Field Name</u>	<u>Data Type</u>	<u>Size</u>	<u>Constraints</u>	<u>Description</u>	<u>Example</u>
1	Rule_id	Int	-	Primary Key	Rule Id	1
2	Rule_ Description	Varchar	200	Not Null	Hostel rule details	No entry after 12:30am
3	Category	Char	30	Not Null	Rule category	Discipline
4	Fine_Amount	Int	-	Not Null	Penalty amount	500

Table Name : Complaint_Master

Description : It will store the data of complaint

Primary Key : Complaint_id

<u>Sr no.</u>	<u>Field Name</u>	<u>Data Type</u>	<u>Size</u>	<u>Constraints</u>	<u>Description</u>	<u>Example</u>
1	Complaint_id	Int	-	Primary Key	Complaint Id	101
2	Stud_id	Int	-	Not Null, Foreign Key	Student Id who complaint	301
3	Type	Char	30	Not Null	Complaint type	Water or Fees or Room
4	Description	Varchar	200	Not Null	Complaint details	Water not coming from 2 days
5	Date	Date	-	Not Null	Complaint date	15-01-2026

Table Name : Notice_Master

Description : It will store the data of Notice

<u>Sr no.</u>	<u>Field Name</u>	<u>Data Type</u>	<u>Size</u>	<u>Constraints</u>	<u>Description</u>	<u>Example</u>
1	Notice_ID	Int	-	Primary Key	Notice Id	101
2	Description	Varchar	200	Not Null	Notice details	No water supply notice
3	Date	Date	-	Not Null	Notice date	05-02-2026

Table Name : Leave_Master

Description : It will store the data of leave

Primary Key : Leave_id

<u>Sr no.</u>	<u>Field Name</u>	<u>Data Type</u>	<u>Size</u>	<u>Constraints</u>	<u>Description</u>	<u>Example</u>
1	Leave_id	Int	-	Primary Key	Leave id	901
2	Stud_id	Int	-	Not Null, Foreign Key	Not Null, Foreign Key	301
3	Date	Date	-	Not Null	Date of leaving hostel	05-02-2026
4	Reason	Varchar	300	Null	Reason for leaving hostel	In 4 days, I am leaving this city.

THANK YOU
