

Kidney Health Awareness

The kidneys are vital organs in the human body responsible for filtering waste products and excess fluids from the blood. They help maintain a healthy balance of electrolytes, regulate blood pressure, and produce important hormones.

Common Kidney Problems:

- Kidney stones
- Chronic kidney disease (CKD)
- Kidney infections
- Acute kidney injury

Signs of Kidney Issues:

- Swelling in legs or face
- Frequent urination
- Fatigue and weakness
- Blood in urine

Tips for Healthy Kidneys:

- Drink plenty of water
- Maintain a balanced diet
- Avoid excessive salt intake
- Exercise regularly
- Get regular health checkups

Organ Donation:

Kidney donation is a life-saving act. A healthy person can donate one kidney and still live a normal life. Organ donation can help patients suffering from kidney failure get a second chance at life.

Stay healthy and take care of your kidneys!
